預防新型冠狀病毒肺炎 - 給公眾的建議
Prevention of Novel Coronavirus Pneumonia – Advice to the Public

[Click here for most updated version](#)

In order to prevent novel coronavirus pneumonia, the Health Bureau urges all residents to stay tuned to the epidemic information of the MSAR Government, support the preventive measures implemented by the authorities, and also to observe personal hygiene, household hygiene and environmental hygiene, in particular:

1. Personal precautions

- 1.1 Avoid travelling to countries or areas affected by the epidemic;
- 1.2 Maintain a safe social distance, avoid gathering/assembly;
- 1.3 Wear a mask whenever leaving home;
- 1.4 Wash hands frequently with water and liquid soap, or rub hands with an alcohol-based handrub; do not touch the eyes, nose and mouth before performing hand hygiene;
- 1.5 Cover nose and mouth with a tissue paper when sneezing and coughing, and then wash hands immediately; if no tissue paper is available, cover nose and mouth with a sleeve or the crook of an elbow, not the palms;
- 1.6 After using the toilet, flush it with the lid closed, and wash hands thoroughly;
- 1.7 Do not share towel with others;
- 1.8 Regularly clean and disinfect frequently-touched surfaces in home or workplace;
- 1.9 Wear gloves when handling articles or places soiled by secretions or excretions;
- 1.10 Avoid staying in crowded places, especially for people with low immunity;
- 1.11 Avoid being in close proximity with patients presenting with fever, dry cough, malaise, sore throat, decreased sense of smell/taste, diarrhoea or other respiratory symptoms;

Prevention of Novel Coronavirus Pneumonia – Advice to the Public

- 1.12 If developing fever, dry cough, malaise, sore throat, decreased sense of smell/taste, diarrhoea or other respiratory symptoms, wear a mask and seek medical attention right away.
- 1.13 Declare health information truthfully on the Macao Health Code app, and record visiting history by scanning the venue QR code upon entering a place.

2. Environmental Hygiene

- 2.1 Regularly clean and disinfect frequently-touched surfaces at home, in the workplace, and in public places, e.g. furniture surfaces, walls, floors, handrails, door knobs, lift buttons, computer keyboards, etc.;
- 2.2 Ensure disposable paper towel and alcohol-based hand sanitizers are provided in public reception area;
- 2.3 Ensure liquid soap, disposable paper towel or hand-dryers (but no reusable towel) are provided in public toilets;
- 2.4 Make sure the drains and pipes are free of blockage or leakage; each drain pipe should be fitted with a trap, pour half a litre of water into each drain at least once a week so as to maintain the water column in the pipe to prevent the spread of micro-organisms;
- 2.5 Keep the toilets clean and well-ventilated, and increase the number of cleaning and disinfection according to sanitary conditions;
- 2.6 All indoor spaces should have windows open as often as possible to keep the environment clean and well-ventilated; for closed space, make sure the ventilation systems are functioning properly and are cleaned and maintained regularly;
- 2.7 Floors, carpets, walls and other surfaces that are soiled by secretions or excretions should be cleaned and disinfected immediately: Use absorbent materials to clean up contaminated surfaces preliminarily, and then disinfect the contaminated surfaces

and surrounding areas with 1:10 diluted bleach. Leave for 30 minutes, then rinse with water and wipe dry;

2.8 Disposable items should never be reused, and should be properly wrapped and disposed of after use;

2.9 Reusable items should be thoroughly cleaned and disinfected before they are provided to others.

Places with possible transmission of the novel coronavirus pneumonia: see the "Special Webpage Against Epidemics" for details (<https://www.ssm.gov.mo/PreventCOVID-19>).
