關於工作人員接種新冠病毒疫苗及接受新冠病毒核酸檢測的指引
Guideline on COVID-19 Vaccination and Nucleic Acid Testing for Staff

In the face of an increasing austere COVID-19 situation worldwide, and vaccination against COVID-19 may effectively reduce infection and transmission, in accordance with stipulations in article 5 of Law no. 2/2004 - “Law on Prevention, Control and Treatment of Infectious Diseases”, the Health Bureau issues the following guideline:

To prevent the spread of COVID-19 in workplaces, all staff are responsible to get vaccinated against COVID-19. Staff who must be in contact with service users during work, or share a confined workplace with others could easily transmit the virus to others if being infected. Staff who have not been vaccinated should undergo nucleic acid test at least once every 7 days.

To take forward the implementation of the guideline, all public and private entities shall, depending on their practical situation, make corresponding arrangements for their staff or staff of their regulated entities, and request for professional opinion from the Novel Coronavirus Response and Coordination Centre when necessary.
