The dOCUMENTA is one of the biggest and worldwide most noted exhibitions of contemporary art. Every five years the whole city of Kassel transforms into a paradise of arts. Works of arts are visible all over the city of Kassel, around every corner, on top of buildings and in parks. Founded by Arnold Bode in 1955, the first dOCUMENTA focused on modern artists such as Picasso or Kandinsky. Nowadays artworks from all continents are exhibited for a period of 100 days, in 2017 from June 10, till September 17, and many of them remain in Kassel.

The dOCUMENTA demonstrates the connection between arts and society and leaves you with a new perspective and a wider horizon.

"Again and again, the documenta has shattered the world of art [...] The history of the documenta is a history of defeats, of doubts, of scandals and, at the same time, of renewal, of discovery and of artistic creativity. Above all, however, it has always been a history of success."
